

*From 20 years,  
the solution to problems in  
areas with danger of explosion*

**QuaSaR**  
service s.r.l.

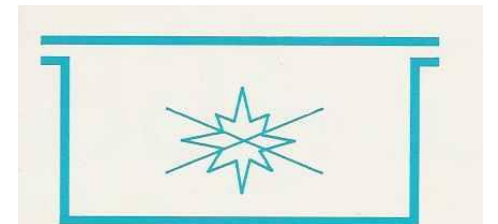

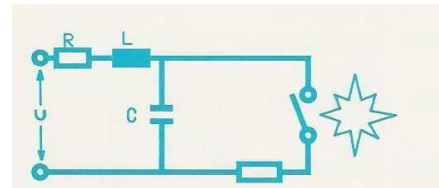

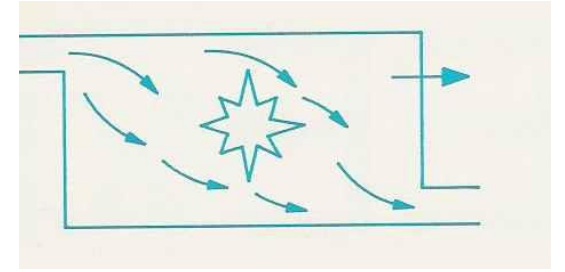

# WHAT WE DO ?

Founded in 2002, Quasar Service is a well-established engineering company, producing explosion protected apparatus, able to satisfy every need in areas with danger of explosion (Ex areas).

Quasar Service can design custom enclosure solutions to meet your specifications

Present on the market for some years, it makes use of staff with more than twenty years of experience in this environment, and, among its customers, includes some major companies operating in the chemical, petrochemical and pharmaceutical field application.

# CERTIFICATES

With regard to electrical equipment for hazardous areas, Quasar Service has the Production Quality Assurance Notification INERIS 03ATEXQ412 in compliance to Annex IV of 2014/34/UE (ATEX) Directive and IECEx quality assessment report No FR/INE/QAR14.0004/06 (equivalent to ATEX Production Quality Assurance Notification)

# PRESSURIZED CABINETS

Quasar Service has developed a line of pressurized cabinets with an EC-type Examination Certificate in accordance with the Directive 2014/34/EU (ATEX) and IECEx.

The certificates, based on tests carried out, allow the installation inside of the pressurized cabinets of any type of electrical equipment, electrical instrumentation and process, terminal operator, PLC, PCs, printers, analyzers liquids or gases or fumes.

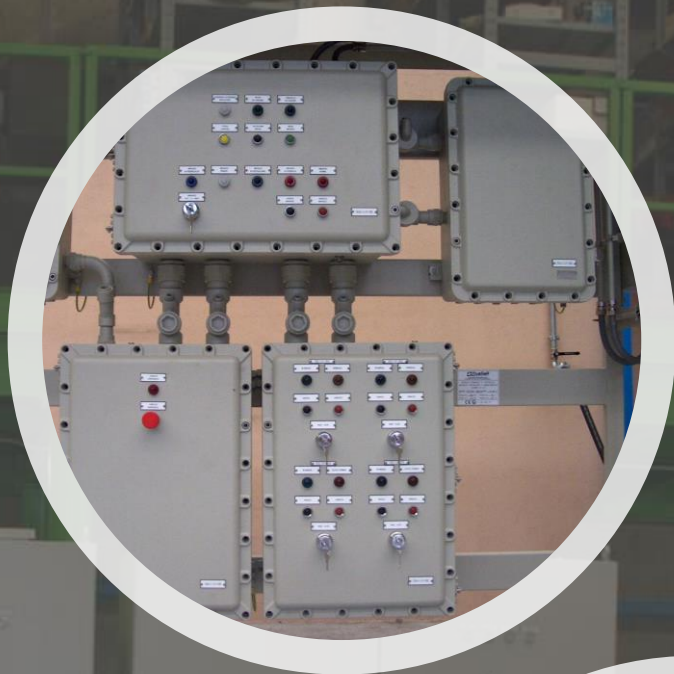

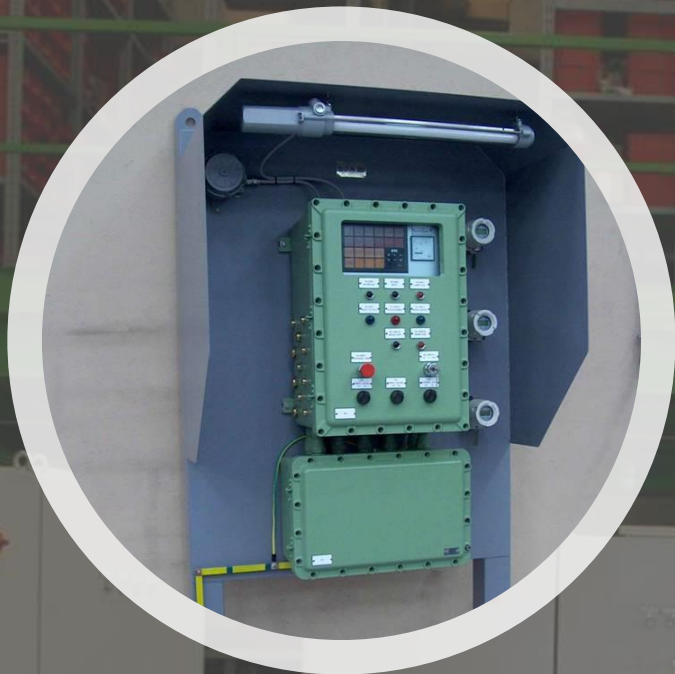

For any other type of material, we are able to assess the feasibility and possible certification of the cabinets.

Our cabinets are certified for installation in zone 1 and 2, with the presence of gas type IIB and IIC, temperature class until T5, and outside temperatures from -40 °C to +60 °C.

Quasar Service is also able to make cabinets for installation in areas with danger of explosion for presence of combustible dusts (Area 22, II 3D).

There are also available various conditioning and heating systems suitable for installation on pressurized cabinets, as well as a keyboard for PC with superficial layer of stainless steel.

## OTHER EX SOLUTIONS

We are able to supply cabinets and junction boxes with different type of protection (Ex d, Ex e, Ex nR, Ex ia)
